### **EXAMINER'S AMENDMENT**

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Harvey S. Kauget on 9/22/04.

The application has been amended as follows:

#### **IN THE CLAIMS:**

In claim 21, line 6, after "cyclic process", insert "having an etching step and a deposition step".

In claim 21, line 10, in between ";" and "and", insert, "thereby reducing notching on the substrate;"

Cancel claims 22-23.

In claim 31, line 1, replace "claim 22" with "claim 21".

2. The following is an examiner's statement of reasons for allowance: The prior art does not teach or suggest a process including the step of pulsing the high density plasma source during a cyclic process including etching and deposition steps for reducing notching on the etched substrate.

Art Unit: 1765

3. The closest prior art Hopkins et al (6,187,685) disclose a cyclic process including alternating etching and deposition step, wherein the bias voltage is pulsed instead of the high power source for eliminating notching (col.3, lines 24-48).

Additionally, Hopkins et al disclose that pulsing the source power will increase and potentially cause unacceptable charge damage and possibly even increased notching (col.2, lines 16-22).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Shamim Ahmed whose telephone number is (571) 272-1457. The examiner can normally be reached on M-Thu (7:00-5:30) Every Friday Off.
